COASTAL COMMAND

The Transformational Years – 1936-1971

Phil Styles

Amazingly Coastal Command operated more than thirty different aircraft types over this period. This lecture will give a brief illustrated scan over this great range of aircraft.

It will then concentrate on the huge advances in construction, engines, radar, electronics, crew skills and management, especially as they applied to six specific types, from the biplane Scapa, through the Hudson, Sunderland, Liberator and Shackleton, to the turbojet-powered Nimrod.

Time and Venue

7.30pm – Wednesday 13th February 2019

Room 017, Beswick Building, University of Chester, Parkgate Rd, Chester, CH1 4BJ

Entrance: RAeS or Branch members – No charge
Others – £4

Prior registration
is not required
